Dear Fred,

As a former PGA tour professional, I am aware that fitness is of the utmost importance. For the past few years I have found that despite strenuous exercise and stretching programs, various areas in my body have become exceedingly painful and my flexibility has diminished; the benefits of age! Between 1965 and 1970 I had three shoulder surgeries, which were only partially successful.

A variety of physicians that I have seen over the years prescribed analgesics, anti-inflammatories, and sleeping medications in limitless quantities. Many of these led to significant gastrointestinal discomfort. In addition, I saw many therapists, including chiropractors, physiotherapists and massage therapists. Despite these strenuous therapeutic efforts, my symptoms continued to increase and my golf scores went up. Sometimes the latter became stratospheric and I seriously considered giving up golf, which has been my life.

Approximately two months ago, I was referred to the Laser Therapy Centre and was seen by Dr. Fred Kahn, the founder. Dr. Kahn indicated that I was suffering from arthritis of the back, shoulders, knees, and there were also varying degrees of myofascitis involved, primarily in the same areas.

After approximately three treatments per week for the first three weeks, and then receiving two treatments per week until the present, virtually all of my symptoms have cleared up. In addition, I have ceased to utilize any medications whatsoever. I now feel better than I did in my 40's and 50's and only require therapy about once a week.

The result of this program is that my flexibility is relatively normal; I can take a full turn on my backswing without any pain whatsoever in either the shoulders or the spine. Most pleasing of all, I am scoring par or better most days and have shot several rounds in competition between 66 and 71!

Over the past few weeks, as a result of this gratifying outcome, I have referred many friends and family members to this clinic for a variety of musculoskeletal disorders and must say that all are equally pleased with the results obtained.

Sincerely,

*Al Balding*
